

Tensegrity Medicine™ I

with
Kelly Clancy, Bowenwork Instructor USA

Brisbane: 24-25 March 2017
Melbourne: 29-30 March 2017
Sydney: 1-2 April 2017

This workshop explores:

This two day assessment workshop will give you the tools and objective measures to provide a more targeted and effective treatment for your clients. By learning to objectively test and document limitations, you will then be able avoid over-treatment, reduce the amount of manual therapy needed within a session. With these assessment techniques, you will be able to educate your clients on the source of their discomfort, communicate client progress to other providers, and document outcomes for provider sources.

Note: this workshop is the same as Kelly's 2015 workshop, Bowenwork, Tensegrity & The Fascial Lines. Attendees of last year's workshop may attend Kelly's new workshop, Tensegrity Medicine™ II to deepen their skills.

In the workshop:

- The student will understand the concept of Tensegrity and its applications to the fascial system.
- The student will gain specific knowledge of the fascial lines, the anatomical landmarks within these lines, and the pathologies commonly associated with them.
- The student will learn to objectively analyse and document postural limitations in the fascial lines, utilising Myofascial Length Testing.
- The student will learn to select appropriate Bowen procedures based on Myofascial Length Testing outcomes.
- The student will learn to objectively evaluate and document pre- and post-treatment measures in order to determine the efficacy of treatment.
- The student will be able to establish a customised manual therapy treatment plan based on objective findings.

About Kelly Clancy, OTR/L, LMP, RBI

Occupational Therapist, Certified Hand Therapist, Structural Medicine Specialist, Registered Bowenwork Instructor

Owner/Director of Seattle Center for Structural Medicine, Northwest School of Structural Therapy

As a Structural Medicine Specialist, Bowen Practitioner, Occupational Therapist, Certified Hand Therapist and Massage Therapist, Kelly uses her skills as a manual therapist and ergonomist to address the postural components that contribute to pain and dysfunction. She addresses not only the structural issues that may be present, but also ergonomic factors and the relationship of stress and its impact on the body's nervous system.

Through body awareness techniques, education on self-care, nutrition, movement, and exercise, Kelly focuses on the multifaceted, multilayered components that lead to greater health and wellness. Her primary goal is to empower her clients to learn and practice a balanced lifestyle that supports health and well being.

Kelly graduated from Colorado State University's school of Occupational Therapy. She completed her sub-specialty training in Hand Therapy and became certified in the early 90s. She received her Bowenwork certification through the American Bowen Academy where she also went on to complete her Instructor training and serves as a Senior Faculty member. She completed her three year training in Structural Medicine through the Institute of Structural Medicine and is a board certified Structural Integrator. She is also graduate of the Institute of Integrative Nutrition where she received her certification in Holistic Health Counseling. Kelly is on clinical faculty with the University of Washington's rehabilitation department where she guest lectures in topics related to hand therapy, orthopaedics and ergonomics.

She currently owns and manages the Seattle Center for Structural Therapy and is also the founder of the Northwest School of Structural Therapy. She is the developer of the Tensegrity Medicine™ methodology. She teaches nationally and internationally lecturing on topics related to Tensegrity, Fascia and therapeutic assessment and treatment strategies.

Suggested Reading

Anatomy Trains, Thomas W. Myers

While not required for taking the course, it would be helpful for students to be familiar with the concept of Anatomy Trains, as outlined by Thomas Myers. We recommend reading Anatomy Trains for reference either before or after the class. A familiarity with general anatomical origin and insertion of muscles, as well as actions will also deepen a student's understanding of the course content.

Students and practitioners may purchase a copy from the BTA shop [here](#) at the Student Price (10% discount) of \$82.30 including postage.

Use the coupon code “**KELLYCLANCY**” at www.bta-units.com.au

CE Credits

This workshop is worth 16 hours CE - BAA Category 1.

Also available: Tensegrity Medicine™ II

Interested in deepening your skills? Join us for Tensegrity Medicine™ II in Brisbane 26-27 March and Sydney 3-4 April. Available at a discounted price of \$900 for both workshops. This course is available to attendees of Tensegrity™ I, as well as attendees of Kelly's 2015 workshop, “Bowenwork, Tensegrity and the Fascial Lines.” See our workshop flyer, Tensegrity Medicine™ II for further details.
